

■ Features

- · Constant Current mode output with multiple levels selectable by dip switch
- Plastic housing with class II design
- Built-in active PFC function
- Functions: 3 in 1 dimming (dim-to-off); Auxiliary DC output; synchronization up to 10 units
- 3 years warranty

Applications

- LED indoor lighting
- · LED office lighting
- · LED architectural lighting
- LED panel lighting

Description

LCM-60U series is a 50W LED AC/DC constant current mode output LED driver featuring the multiple levels selectable by dip switch. LCM-60U operates from 90~132VAC and offers different current levels ranging between 500mA and 1400mA. Thanks to the efficiency up to 89%, with the fanless design, the entire series is able to operate for -30 $^{\circ}$ C ~+90 $^{\circ}$ C case temperature under free air convection. LCM-60U is equipped with various functions, such as the dimming function and synchronization, so as to provide the optimal design flexibility for LED lighting system.

■ DIP SWITCH TABLE

LCM-60U is a multiple-stage constant current driver, selection of output current through DIP switch is exhibited below.

lo DIP S.W.	1	2	3	4	5	6

■ DIMMING OPERATION

3 in 1 dimming function

- · Output constant current level can be adjusted by applying one of the three methodologies between DIM+ and DIM-: 0 ~ 10VDC, or 10V PWM signal or resistance.
- Direct connecting to LEDs is suggested. It is not suitable to be used with additional drivers.
- Dimming source current from power supply: 100µA (typ.)
- O Applying additive 0 ~ 10VDC

"DO NOT connect "DIM- to -V"

O Applying additive 10V PWM signal (frequency range 100Hz ~ 3KHz):

"DO NOT connect "DIM- to -V"

Applying additive resistance:

"DO NOT connect "DIM- to -V"

Dimming input: Additive voltage 100% 90% 70% Output current (%) 60% 40% 30% 20% 0% 0% 10% 20% 30% 40% 50% 60% 70% 80% 90% 100% Duty cycle of additive 10V PWM signal dimming input

Note: 1. Min. dimming level is about 6% and the output current is not defined when 0% < Iout < 6%.

- 2. The output current could drop down to 0% when dimming input is about 0kΩ or 0Vdc, or 10V PWM signal with 0% duty cycle.
- 3. Please do not activate" temperature compensation" when performing dimming operation.

■ SYNCHRONIZATION OPERATION

- Synchronization up to 10 drivers (1 master + 9 slaves)
- Dimming operating range: 10%~100%
- Sync cable length: < 5m
- Sync cable type : Flat cable
- Sync cable cross section area: 22 24 AWG (0.2~0.3mm²)

NOTE: 1. Please make sure all units are set to 100% dimming setting (factory default) before synchronizing.

2. Min. Dimming operating range depends on dimmer setting.

■ TEMPERATURE COMPENSATION OPERATION

LCM-60U have the built-in temperature compensation function; by connecting a temperature sensor (NTC resistor) between the +NTC /-NTC terminal of LCM-60U and the detecting point on the lighting system or the surrounding environment, output current of LCM-60U could be correspondingly changed, based on the sensed temperature, to ensure the long life of LED.

© LCM-60U can still be operated normally when the NTC resistor is not connected and the value of output current will be the current level selected through the DIP switch.

NTC reference:

NTC resistance	Output Current
220K	< 60°C, 100% of the rated current (corresponds to the setting current level) > 60°C, output current begins to reduce, please refer to the curve for details.
330K	< 70° C, 100% of the rated current (corresponds to the setting current level) > 70° C, output current begins to reduce, please refer to the curve for details.
470K	< 80° C, 100% of the rated current (corresponds to the setting current level) > 80° C, output current begins to reduce, please refer to the curve for details.

Notes: 1. MEAN WELL does not offer the NTC resistor and all the data above are measured by using THINKING TTC03 series.

- $2. \ If other brands of NTC \ resistor \ is \ applied, please \ check \ the \ temperature \ curve \ first.$
- O Dimming and synchronization function of the driver will be invalid when the "temperature compensation" function is in use.
