

75W Triple Output Switching Power Supply

NET-75 series

Features:

- Universal AC input / Full range
- Protections: Short circuit / Over load / Over voltage
- Cooling by free air convection
- 100% full load burn-in test
- 2 years warranty

| NOTE | 1. All parameters NOT specia | ially mentioned are measured at 230VAC input, rated load and 25°C of ambient temperature. | | | | | | | | | | | |

NOTE

- 2. Ripple & noise are measured at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a 0.1uf & 47uf parallel capacitor.
- 3. Tolerance : includes set up tolerance, line regulation and load regulation.

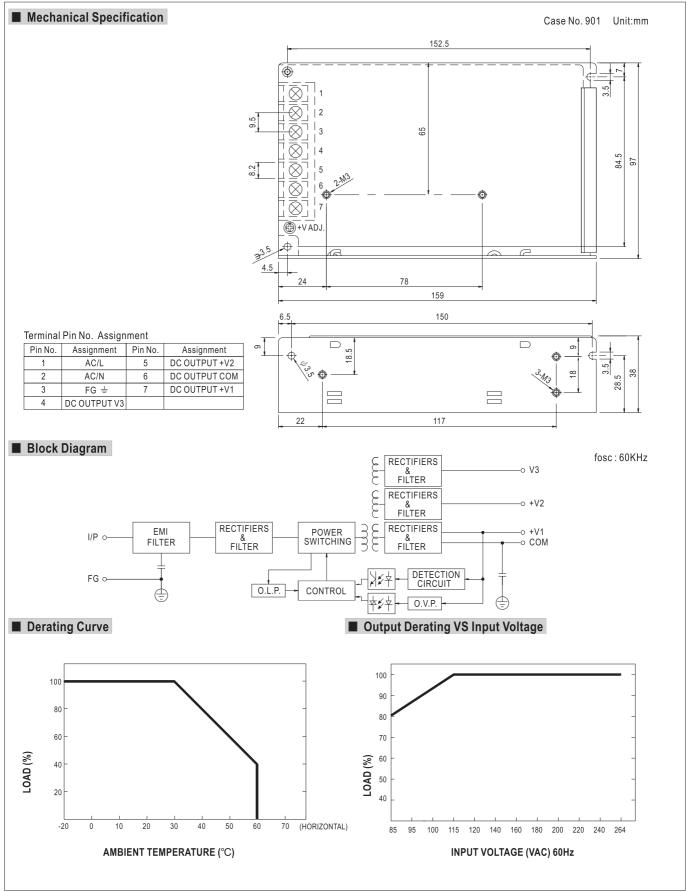

- 4. Line regulation is measured from low line to high line at rated load.
 5. Load regulation is measured from 20% to 100% rated load, and other output at 60% rated load.
 6. Each output can work within current range. But total output power can't exceed rated output power.
 7. The power supply is considered a component which will be installed into a final equipment. The final equipment must be re-confirmed that it still meets EMC directives. For guidance on how to perform these EMC tests, please refer to "EMI testing of component power supplies." (as available on http://www.meanwell.com)
